## MSG 20

Compact seat with mechanical suspension

# MSG 20

## Technical data

### Compact seat

All MSG 20 seats are optimally designed to attenuate the vibrations to which forklift operators are typically subjected, featuring suspension travel of 60 mm. They are also simple to set to any user weight between 50 and 130 kg. In addition, the seat's fore-aft position can be varied by 150 mm or 210 mm, depending on the seat version, to provide enough space for every body size and work situation.

### Features
