MSG 20 NARROW

Compact seat with mechanical suspension

MSG 20 NARROW

Technical data

Compact seat

All MSG 20 seats are optimally designed to attenuate the vibrations to which forklift operators are typically subjected, featuring suspension travel of 60 mm. They are also simple to set to any user weight between 50 and 130 kg with an easy-to-use lever on the backrest, resulting in optimal suspension comfort for every operator. In addition, the seat's fore-aft position can be varied by up to 150 mm to provide enough space for every body size and work situation. The narrow version with a cushion width of 410 mm is specially optimized for reach-type forklift trucks.

Mechanical Suspension

Mechanical Weight Adjustment

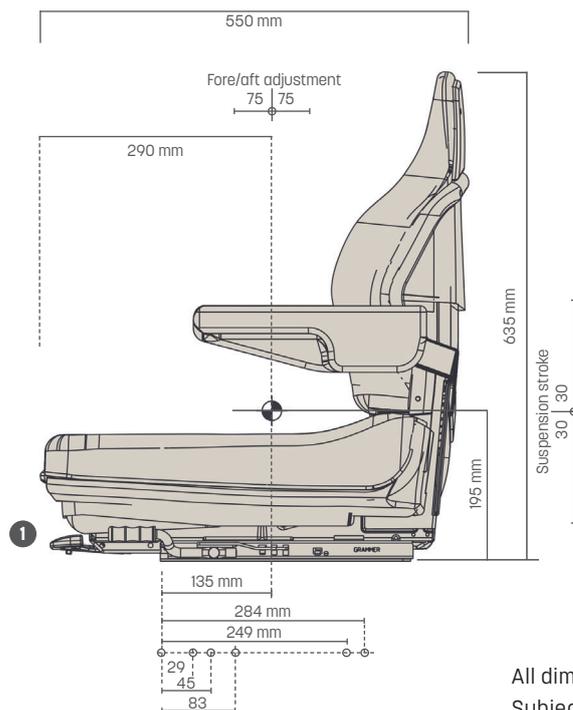

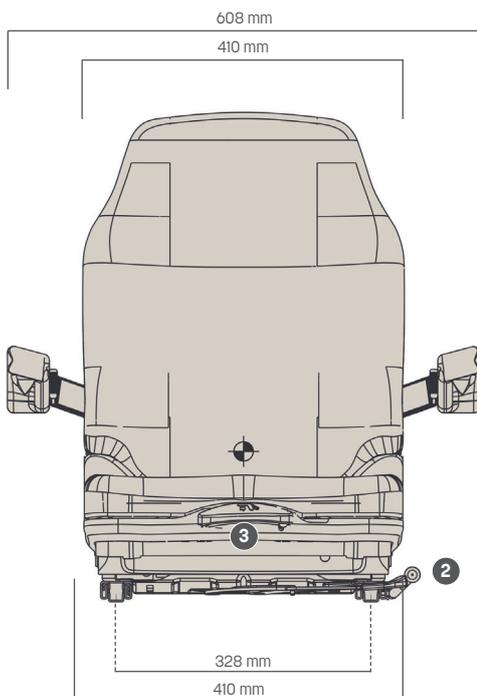

Features

	MSG 20 NARROW
