

Miles ahead in
comfort and ergonomics

ROADTIGER® driver seats
for commercial vehicles.

grammer.com

ROADTIGER® strengthens your back in your challenging daily driving routine.

A comfortable driver seat is not a superfluous luxury but a valuable investment in your performance, safety and health. With this conviction and our awareness of what you as a truck driver must accomplish every day, we at GRAMMER always have your back when it comes to ergonomic driver seats.

The best example of this is our ROADTIGER® series for commercial vehicles. These innovative retrofit seats offer maximum comfort and functionality for a relaxed driving experience – on long and short hauls alike. With their modern and appealing design and high-quality upholstery, the ROADTIGER® seats enhance the cabin in every respect. This is also testified to by the receipt of the coveted Red Dot Design Award.

Yet, GRAMMER models also set standards in top-class driver seats when it comes to ergonomics, quality, safety and economy. In the top-of-the-line version, the ROADTIGER® seats with their pneumatic suspension boast extensive features such as adjustable side support in the backrest and seat cushion, shoulder support, a height-adjustable 3-point seat belt, adjustable damping characteristics, a fore/aft isolator, seat climate control, seat heating and much more. They come in three different versions – STANDARD, COMFORT and LUXURY – all offering carefully thought-out solutions for all users perfectly tailored to truck drivers' daily requirements.

SEATING COMFORT OPTIMIZES WORK PERFORMANCE.

The ROADTIGER® highlights* for excellent day-to-day ergonomics

- Ergonomic seat cushion with high-quality genuine leather cover
- Adjustable side support in the backrest and seat cushion

The ergonomics of ROADTIGER® LUXURY and ROADTIGER® COMFORT.

Our ROADTIGER® driver seats are characterized by exemplary operating comfort and ergonomic design that has been thought through down to the very last detail. The aim of our product development was to design seats that drivers can adapt optimally to their individual body dimensions and preferred seating position. TÜV Rheinland confirms that this has been impressively achieved: The top-of-the line ROADTIGER® LUXURY and COMFORT models were awarded the LGA "Ergonomics Approved" certificate after comprehensive testing. GRAMMER driver seats meet all the requirements of a modern ergonomic driver seat in terms of the design of the seat, the controls and vibration response. They are suitable for different types of drivers and ideal for long and demanding hauls.

Extremely adaptable

With its shoulder adjustment, adjustable side support for the back and seat cushion (LUXURY model) and adjustable seat cushion depth, the seat can be individually adjusted to suit any body build.

Built to last

Durable padding and a high-quality leather cover (LUXURY model) ensure many years of enjoyment of your ROADTIGER®.

In tranquility lies ergonomics

The pneumatic suspension with an adjustable shock absorber and fore/aft isolator ensures fatigue-free driving and healthy sitting even on long hauls.

Perfect working atmosphere

Integrated climate systems prevent unpleasant sweating on the back and premature fatigue. And the two-step seat heating provides cozy warmth on cold days.

Maximum safety

The height-adjustable 3-point safety belt with belt pretensioner (optional) can be optimally adjusted to suit all body sizes.

Greater support

The pneumatic lumbar support individually adjusts to the driver's back, providing optimum support for the lumbar region.

Further features of the ROADTIGER® series in detail

Fore/aft isolator

Minimizes horizontal vibrations caused by pitching movements of the cab when driving fast, with trailers attached or in rough terrain.

Automatic weight adjustment

The seat automatically adjusts to the driver's weight, thus ensuring a relaxed and healthy seating posture.

Tunnel-side backrest release

With the tunnel-side backrest release, you can conveniently create additional space by simply folding down the backrest.

A perfect fit.

The ROADTIGER® LUXURY

High-end driver seat with climate system and excellent ergonomics

We have designed the ROADTIGER® LUXURY for drivers who demand the very best in ergonomics, comfort and safety. Both in terms of its feature set and its design, it is an absolute highlight in the cab. Its upholstery is made from genuine high-quality leather of a type also found in the automotive luxury class.

The ROADTIGER® LUXURY's active seat climate system ensures perfect conditions by keeping the seat at an optimum temperature at all times. The climate system removes moisture from the body, preventing the driver from sitting in a pool of sweat at the steering wheel even on the hottest days. On cold days, the seat heating system provides pleasant warmth. The excellent pneumatic suspension in combination with the adjustable side support fitted to the backrest and seat cushion ensures luxurious made-to-measure ride comfort.

In this way, the ROADTIGER® LUXURY provides lasting driving pleasure on both long and short hauls.

The ROADTIGER® COMFORT

Comfort driver seat with multiple adjustment possibilities

When it comes to the ROADTIGER® COMFORT, the name says it all: the comfort features of this high-quality driver seat go far beyond what most drivers experience with their standard factory-fitted seats.

The passive climate system and two-step seat heating ensure well-being and relaxed driving in all temperatures. The popular GRAMMER seat also leaves little to be desired in terms of its ergonomics.

Pneumatic shoulder adjustment and lumbar support, adjustable side support in the backrest, adjustable seat cushion depth and three-step belt height adjustment allow you to adapt your ROADTIGER® COMFORT to your individual seating needs to optimum effect.

The ROADTIGER® STANDARD

Standard driver seat with numerous comfort features

Even our entry-level ROADTIGER® STANDARD model offers comfort features that are anything but standard elsewhere.

With its pneumatic suspension system with automatic weight adjustment as standard equipment, it offers the unrivaled suspension comfort of air-suspended seats. It also comes with a fore/aft isolator, pneumatic lumbar support and an infinitely adjustable backrest.

The seat tilt adjustment and the adjustable seat cushion depth are further features of the ROADTIGER® STANDARD to ensure ergonomic and fatigue-free sitting in challenging day-to-day routines.
